| 6. In order to ensure harmonised conditions for the application of paragraph 5, the Commission shall adopt delegated acts in accordance with Article 38a establishing a common methodology for the calculation of the weight of metals that have been recycled in conjunction with incineration, including, the quality criteria for the recycled metals. | 6. In order to ensure harmonised conditions for the application of paragraph 5, the Commission shall adopt delegated acts in accordance with Article 38a establishing a common methodology for the calculation of the weight of metals <b>and minerals</b> that have been recycled in conjunction with incineration <b>and co-incineration</b> , including, the quality criteria for the recycled <b>materials</b> . |

**JUSTIFICATION**

The recovery of waste containing (non-critical) material through co-incineration should also be accounted for as it can lead to significant recycling through raw material substitutions.

**Par. (26 -NEW-). Annex II WFD “Co-incineration”.**

**Amendment 12**

**COM (2015) 595**

| <b>JUSTIFICATION</b><br>The guidelines on the interpretation of key provisions of Directive 2008/98/EC states that certain processes can combine two or more recovery operation, thereby allowing simultaneous energy and material recovery leading to recycling. <del>Such multiple recovery practices in industry ought to be recognised and encouraged.</del> |  |

**JUSTIFICATION**  
Time limitations are an obstacle to future recovery economy. Since recovery from landfill is costly in possibility of recovery, while security conditions are met, indefinite storage should be allowed

**JUSTIFICATION**  
The roles and responsibilities of each and every one of the links in the chain, because they play an important role in the proper functioning of the process and it will provide incentives for the system to work efficiently.
